Inhaltsverzeichnis

CRASH PULSE AND KINEMATICS

Introduction
Vehicle Impact Modes and Crash Data Recording
Digital Filtering Practice per SAE J211 and ISO 6487
Basic Kinematic Relationships
Impact and Excitation: Vehicle and Sled Test Kinematics
CRASH PULSE CHARACTERIZATION

Introduction
Moment-Area Method
Pulse Approximations with Non-Zero Initial Deceleration
Pulse Approximations with Zero Initial Deceleration
Fourier Analysis of Crash Pulse
References

CRASH PULSE PREDICTION--THE CONVOLUTION METHOD

Introduction
Transfer Function via Convolution Integral
Transfer Function and a Spring-Damper Model
Belted and Unbelted Occupant Performance with Air Bag
Body Mount and Torso Restraint Transfer Functions
Effect of Sled and Barrier Pulses on Occupant Response
Other Applications
Response Inverse Filtering
References

BASICS OF IMPACT AND EXCITATION MODELING

Introduction
Impact and Excitation--Rigid Barrier and Hyge Sled Tests
Ridedown Existence Criteria and Efficiency
Basics of Spring and Damper Dynamic Modeling
Two-Mass and Effective Mass Systems
Vehicle-to-Barrier Impact: Spring-Mass Model
Spring-Mass Occupant Model Subjected to Excitation
Vehicle-to-Vehicle Impact: Spring-Mass Model
A Maxwell Model
Impact on Kelvin Model--Vehicle or Component
Damping Factor and Natural Frequency from Tests
Excitation on the Kelvin Model--Occupant and Restraint
References

RESPONSE PREDICTION BY NUMERICAL METHODS

Introduction
Hybrid Model--A Standard Solid Model
Two Mass-Spring-Damper Model
Natural Frequencies in Two-Mass System
Numerical Searching Techniques
IMPULSE, MOMENTUM, AND ENERGY

Introduction
Background
Center of Gravity and Motion Theorem
Impulse and Circle of Constant Acceleration
Principle of Work and Energy
Vehicle Inertia Properties and Critical Sliding Velocity
Rollover Crashes
Eccentric Loading on Vehicle Rollover
References

CRASH SEVERITY AND RECONSTRUCTION

Introduction
Occupant Motion Under Impact and Excitation
Preloading on an Occupant
Central Collisions
Non-Central Collisions
Use of DV and BEV of Vehicles in Crash Severity Assessment
Vehicle Acceleration and Crash Severity
Velocity and Energy Distributions in Two-Vehicle Impact
Computation of Barrier Equivalent Velocity
Intermediate Mass Effect
Modeling the Vehicle-to-Vehicle Compatibility Test
Accident Reconstruction Methodology
References
